

CS410 Weekly Development Report

Team Copper

Performance Period: Tues 3/18- Monday 3/24

(Note: there should be one report **posted to the project website** at the end of each week...)

1. **Summary of Group Accomplishments:** <designated team member should summarize group accomplishments>
 - Created the what-if analysis feature, implementing OpenAI gpt-4o-mini to make recommendations on what-if reports.
 - Revised the dashboard graphs
 - Began fleshing out budget creation
 - Finished the community page and merged to main.
 - Began implementing rewards page with GameLayer API/Laravel-gamify.
2. **Individual Contributions/Accomplishments:** (to be filled out by each individual)
 - **Erika:**
 - i. Filled in Solution statement and Solution characteristics portion for the Poster draft
 - ii. Changed poster header to match CreditTrax theme
 - iii. Got rid of customized payment reminders in Solution Characteristics (we won't be implementing them in the prototype)
 - iv. Set up Jest testing and added appropriate dependencies. Also made a unit test for rewards.
 - **Brian:**
 - i. Added the current UI designs to UI sections on poster, added the MFCDs and RWP vs. Prototype feature table to poster
 - ii. Changed color theme to match app's theme.
 - iii. Changed the order of slide contents, updated feature tables to current progress.
 - iv. Got rid of payment reminders and mentions of educators and PFP in feature tables.
 - v. Worked on the savings analysis type for what-if analysis
 1. Implemented the input fields, analysis, and chatbot service.
 - **Bryce:**
 - **Darrick:**
 - i. Updated repayment timeline chart inside of what-if reports based on feedback from biweekly mentor meeting
 - ii. Removed interest paid and principal paid lines from the chart and left remaining balance.
 - iii. Updated chart to display data points in years rather than months when a debt exceeds 36 months until full repayment.
 - iv. Created unit tests to test what-if report functionality.
 - v. Improved the goal impact section of what-if reports by displaying conditional messages based on the report's results.
 - **Smit:**
 - **Josh:**
 - i. Reworked Budget backend, added DB fields
 - ii. Updated website to have lab 2 section

CS410 Weekly Development Report

- Indi:

3. Key Objectives for Coming Week (top level prototype development objectives)

- Find solutions to solve laravel-gamify migration file issue.
- Finish the budget feature.

4. Issues/Concerns: Examples below...

- Encountered significant errors with GameLayer API, so switched to laravel-gamify.
- Still an issue with migrating auto-generated migration files for laravel-gamify.
 - i. Name 'reputation' appears in 2 different migration files.
- Have to reprogram the budget backend to match with frontend.
